MAP OF PART OF
PEACE RIVER DISTRICT
ALBERTA

Scale : 6 miles to one inch.

CLASSIFICATION OF LANDS BY QUARTER-SECTIONS
FOR
SETTLEMENT PURPOSES

PREPARED BY THE
TOPOGRAPHICAL SURVEYS OFFICE
1922 EDITION
Corrected to February 1, 1922

NOTE.—The lands indicated on this map were classified after careful investigation, the *primary purpose* being to save the prospective settler time and effort in searching over more or less worthless areas and to assist him in locating lands suitable for settlement. It is not intended that the map be used to make a final selection. As the responsibility for such a choice rests entirely on the settler himself, he should personally inspect the quarter-sections that particularly interest him, before deciding on a location.
Information regarding the soil, timber and the general character of the quarter-sections is on file at the local Dominion Lands Office for such district.
Copies of this map may be obtained at the local land offices and from the Topographical Surveys Branch, Ottawa.

LEGEND

LANDS NOT OPEN FOR HOMESTEAD ENTRY.
Patented, homesteaded or leased ; Indian reserves and school lands
Lands for which application for lease has been made or lands provisionally reserved for water-powers reclamation or townsite purposes
Forest and timber reserves

LANDS SUITABLE FOR IMMEDIATE SETTLEMENT.
Considerable portion ready for breaking with very little clearing-soil good

LANDS CONSIDERED ONLY FAIR FOR SETTLEMENT.
More or less open—but soil on whole may not be the best, or part of quarter-section may be too rough or too wet—lands where soil is partially damaged by fire are placed in this class if quarter is otherwise suitable for immediate settlement

LANDS WHICH CAN BE ECONOMICALLY IMPROVED.
Good soil, lightly timbered, requiring some clearing before breaking

LANDS WITH SUITABLE SOIL BUT REQUIRING EXTENSIVE IMPROVEMENTS
Usually covered with poplar requiring considerable clearing before breaking. Summer pasture usually good

HAY MEADOWS
Containing at least forty acres of meadow land producing wild hay. Some of these quarters would be suitable for cultivation, except for risk of flooding

GRAZING LANDS
Open or semi-open hillsides, too rough for breaking. When adjoining homesteads they are valuable for grazing purposes

LANDS OF NO AGRICULTURAL VALUE
In present condition not suitable for settlement, being usually stony, gravelly, sandy or very wet

Main through roads
Roads fit for wheel traffic
Pack trails
River 3 chains wide or over
River under 3 chains wide, Brook, Creek
Telegraph lines
Elevations

Town or village, population 300 or over
